10 Weeks of Discovery that will Put You on the Right Path to a Career in Archaeology

Join our seasoned field staff and the archaeologists at the Ohio Historical Society as we Investigate Ohio's early Settlement history at Pickawillany.

Expand your environmental awareness through the discovery of land use patterns and human impact in the Wayne National Forest

Find out about the daily lives of Marietta's first settlers while excavating a large prehistoric Indian village that dates to A.D. 1300.

Current Tuition and general fee costs can be viewed online at www.hocking.edu.

UPDATES Maintained at: online.hocking.edu/~ericksen_a

Hocking Field School students working on a prehistoric village site in Marietta, Ohio. The students excavated and recorded data from the units, then processed and recorded the artifacts collected.

Hocking Students Bring Ohio's Past to Life

Hocking students work closely with community organizations to help preserve the past for future generations. Awareness of the need for public education and outreach ensures that archaeological resources are properly managed.

It's more than just digging, archaeology is an exacting science and a rewarding career that serves the public. The employment outlook for incoming technicians is excellent.

Modeled after the real world workplace, the Hocking Field School is highly regarded in the Cultural Resource Management Industry and will celebrate it's 11th year of academic excellence.
